

## Sun Protection Policy

### Sun Protection Policy

At Wickham Montessori we acknowledge the importance of sun protection and want staff and children to enjoy the sun safely. We will work with staff and parents to achieve this through:

Parents and guardians will be informed about what we do about sun protection and how they can help at the beginning of the summer term and during summer holidays.

#### **Protection:**

- We will encourage students to sit/play in the shade where it is available.
- We have erected sails over the children play area.
- We have bought a pop-up gazebo to provide instant shade.
- Avoid using the top garden before 3pm or when the heat has subsided.
- Use the shade of the woods during the day and set up Forest school activities for the older children

#### **Timetabling:**

- Children will spend more time playing outside before 11am and after 3pm, and throughout the day if cooler than the inside classrooms.
- Always have water play as this will help to keep the children cool.

#### **Clothing:**

- Children are required to wear hats that cover the ears, face and neck between all times when outside.
- We have bought some nursery hats to give to children who forget their own.
- All staff should wear hats when outside to set a good example.

#### **Sunscreen:**

- Parents have been asked to put 12 hour sunscreen on children before bringing them to school.
- Parents have been asked to supply additional sunscreen to top up when needed.
- Children will need to bring in their own clearly labelled bottle of sunscreen, at least factor 20+.
- Permission is given by parents for us to apply sun cream to children.
- We cannot currently supply sunscreen to all children on a daily basis because of cost.

#### **Drinks & food:**

Fresh cold water will be available at all times for the children.

Ice lollies and frozen ice pops should be available.

All staff should be aware of the possibility of **Heat stroke - Heat exhaustion - Heat stress**. See attached leaflets from Public Health England for further guidelines.
